

SAV-3001_Documentation

Customer reported issue while working with templates. They followed the public documentation but could not complete the task successfully.

[TODO: Solution overview not provided]

[TODO: Key capabilities not provided]

[TODO: Benefits not provided]

- Add troubleshooting steps or common error resolutions within the 'Authenticate & Confirm' section, such as 'Authentication Failed' indications and guidance.

- Include detailed examples and common pitfalls for granting the correct privileges and roles, and validate existing steps against potential user errors for the SAP HANA Database Connector.

- Include a troubleshooting section in the Google Analytics 4 Connector article to address common configuration errors, particularly focusing on validating and troubleshooting the 'UA Property ID' during the authentication process.

[TODO: Dependencies not provided]
